Volume Contents

Number 1. September

1 **Chloroplast Biogenesis 49. Differences among Angiosperms in the Biosynthesis and Accumulation of Monovinyl and Divinyl Protochlorophyllide during Photoperiodic Greening**—Edward E. Carey and Constantin A. Rebeiz*

7 **Analysis of Guard Cell Viability and Action in Senescing Leaves of *Nicotiana glauca* (Graham), Tree Tobacco**—Richard Ozuna, Ramon Yera, Kim Ortega, and Gary Tallman*

11 **Alterations in Growth, Photosynthesis, and Respiration in a Starchless Mutant of *Arabidopsis thaliana* (L.) Deficient in Chloroplast Phosphoglucomutase Activity**—Timothy Caspar, Steven C. Huber, and Chris Somerville*

18 **An Evaluation of the Role of Ethylene in Herbicidal Injury Induced by Picloram or Clopyralid in Rapeseed and Sunflower Plants**—J. Christopher Hall*, Pawan K. Bassi, Mary S. Spencer, and William H. Vanden Born

24 **Relationship between Stress-Induced ABA and Proline Accumulations and ABA-Induced Proline Accumulation in Excised Barley Leaves**—Cecil R. Stewart* and Gary Voetberg

28 **Effect of Calmodulin Antagonists on Auxin-Induced Elongation**—K. G. Raghothama, Yosef Mizrahi, and B. W. Poovaiah*

34 **Starch Branching Enzymes from Maize. Immunological Characterization Using Polyclonal and Monoclonal Antibodies**—Bijay K. Singh and Jack Preiss*

41 **A Novel Method of Natural Cryoprotection. Intracellular Glass Formation in Deeply Frozen *Populus***—Allen G. Hirsh*, Robert J. Williams, and Harold T. Meryman

57 **Enzymic Properties of Ribulose-1,5-bisphosphate Carboxylase/Oxygenase Purified from Rice Leaves**—Amane Makino*, Tadahiko Mae, and Koji Ohira

62 **Determination of Diamine Oxidase in Lentil Seedlings by Enzymic Activity and Immunoreactivity**—Rodolfo Federico*, Riccardo Angelini, Alberinda Cesta, and Carlo Pini

65 **Correct Targeting of the Bean Storage Protein Phaseolin in the Seeds of Transformed Tobacco**—John S. Greenwood and Maarten J. Chrispeels*

72 **Surface Properties of Right Side-Out Plasma Membrane Vesicles Isolated from Barley Roots and Leaves**—Lena E. Körner, Per Kjellbom, Christer Larsson, and Ian M. Møller*

80 **Polyamines and Root Formation in Mung Bean Hypocotyl Cuttings. II. Incorporation of Precursors into Polyamines**—Ra'anan Friedman, Arie Altman*, and Uriel Bachrach

84 **Isolation of Bundle Sheath Cell Chloroplasts from NADP-ME Type C_4 Plant *Zea mays*. Capacities for CO_2 Assimilation and Malate Decarboxylation**—Colin L. D. Jenkins* and Stuart Boag

90 **Studies in Conditions for Cell Division and Embryogenesis in Isolated Pollen Culture of *Nicotiana rustica***—Masaharu Kyo* and Hiroshi Harada

95 **Isolation of Serine:Glyoxylate Aminotransferase from Cucumber Cotyledons**—David Hondred, John McC. Hunter, Robert Keith, David E. Titus, and Wayne M. Becker*

103 **Peroxidase Activity in Relation to Suberization and Respiration in White Spruce (*Picea glauca* [Moench] Voss) Seedling Roots**—Anne M. Johnson-Flanagan* and John N. Owens

108 ***In Vitro* Processing of Precursors of Thylakoid Membrane Proteins of *Chlamydomonas reinhardtii* y-1**—Dawn B. Marks*, Barbara J. Keller, and J. Kenneth Hoober

114 **Hexose Kinases from the Plant Cytosolic Fraction of Soybean Nodules**—Les Copeland* and Matthew Morell

118 **Adaptation of Tobacco Cells to NaCl**—Marla L. Binzel*, Paul M. Hasegawa, Avtar K. Handa, and Ray A. Bressan

126 **Proteins Associated with Adaptation of Cultured Tobacco Cells to NaCl**—Narendra K. Singh, Avtar K. Handa, Paul M. Hasegawa, and Ray A. Bressan*

138 **Abscisic Acid Accelerates Adaptation of Cultured Tobacco Cells to Salt**—P. Christopher LaRosa, Avtar K. Handa, Paul M. Hasegawa, and Ray A. Bressan*

143 **Importance of Environmental pH during Root Development of Phosphate Absorption**—Michael J. Webb and Jack F. Loneragan*

149 **Interactions between Mild NaCl Stress and Red Light during Lettuce (*Lactuca sativa* L. cv Grand Rapids) Seed Germination**—Keith N. Scorer*, B. L. Epel, and Yoav Waisel

153 **Direct Observation of Reversible and Irreversible Stomatal Responses of Attached Sunflower Leaves to SO_2**—Kenji Omasa*, Yasushi Hashimoto, Paul J. Kramer*, Boyd R. Strain, Ichiro Aiga, and Jiro Kondo

159 **Pyrophosphate-Driven Proton Transport by Microsomal Membranes of Corn Coleoptiles**—Alain Chanson, Jenny Fichmann, David Spear, and Lincoln Taiz*

165 **CO_2 Assimilation and Malate Decarboxylation by Isolated Bundle Sheath Chloroplasts from *Zea mays***—Stuart Boag* and Colin L. D. Jenkins

171 **Oxygen-Dependent Exclusion of Sodium Ions from Shoots by Roots of *Zea mays* (cv Pioneer 3906) in Relation to Salinity Damage**—Malcolm C. Drew and Andre Läuchli*

177 **Effect of Carbonic Anhydrase Inhibitors on Inorganic Carbon Accumulation by *Chlamydomonas reinhardtii***—James V. Moroney*, H. David Husic, and N. E. Tolbert

184 **Errors in Measuring Water Potentials of Small Samples Resulting from Water Adsorption by Thermocouple Psychrometer Chambers**—Jerry M. Bennett* and Peter M. Cortes

189 **Leaf K^+ Interaction with Water Stress Inhibition of Nonstomatal-Controlled Photosynthesis**—Gerald A. Berkowitz* and Christa Whalen

194 **Ethylene and the Growth of Rice Seedlings**—Sergio O. Satler and Hans Kende*

199 **Effects of CO_2 and O_2 on the Photosynthetic O_2 Evolution of *Spirodela polyrrhiza* Turions**—Sven Beer*

202 **Temperature Dependence of Carbon Isotope Fractionation in CAM Plants**—Eliane Deleens, Isabel Treichel, and Marion H. O'Leary*

207 **Displacement of CA^{2+} by Na^+ from the Plasmalemma of Root Cells. A Primary Response to Salt Stress?**—Grant R. Cramer, André Lauchli*, and Vito S. Polito

212 **Localization, Purification, and Characterization of Shikimate Oxidoreductase-Dehydroquinate Hydrolyase from Stroma of Spinach Chloroplasts**—Erich Fiedler* and Gernot Schultz

219 **Physiological Potential for Survival of Propagules of Crassulacean Acid Metabolism Species**—Peter A. Holthe and Stan R. Szarek*

225 **O_2 Uptake in the Light in *Chlamydomonas*. Evidence for Persistent Mitochondrial Respiration**—Gilles Peltier* and Pierre Thibault

231 **Chloroplast Protein Synthesis in the Chromophytic Alga *Olisthodiscus luteus*. Cell Cycle Analysis**—Michael E. Reigh and Rose Ann Cattolico*

237 **Phloem Unloading in Developing Leaves of Sugar Beet. I. Evidence for Pathway through the Symplast**—J. Gougler Schmalstig* and Donald R. Geiger

242 **Pyruvate Decarboxylase from *Zea mays* L. I. Purification and Partial Characterization from Mature Kernels and Anaerobically Treated Roots**—Thomas C. Lee and Pat J. Langston-Unkefer*

248 **Chlorophyll Fluorescence Characteristics Associated with Hydration Level in Pea Cotyledons**—Christina W. Vertucci, James L. Ellenson, and A. Carl Leopold*

253 **Intracellular Calcium and Calmodulin Involvement in Protoplast Fusion**—Howard D. Grimes and Wendy F. Boss*

259 **Phosphatidylglycerol Synthesis in Pea Chloroplasts. Pathway and Localization**—Jaen Andrews and J. Brian Mudd*

266 **Physiological Changes in Cultured Sorghum Cells in Response to Induced Water Stress. I. Free Proline**—Shyamala Bhaskaran*, Roberta H. Smith, and Ronald J. Newton

270 ***In Situ* Measurement of Plant Water Potentials by Equilibration with Microdroplets of Polyethylene Glycol 8000**—Donald B. Fisher

274 **Light and Thiol Activation of Maize Leaf Glycerate Kinase. The Stimulating Effect of Reduced Thioredioxins and ATP**—Leszek A. Kleczkowski and Douglas D. Randall*

278 **Transmembrane Proton Electrochemical Gradients in Dark Aerobic and Anaerobic Cells of the Cyanobacterium (Blue-Green Alga) *Anacystis nidulans*. Evidence for Respiratory Energy Transduction in the Plasma Membrane**—Günter A. Peschek*, Thomas Czerny, Georg Schmetterer, and Wolfgang H. Nitschmann

285 **Influence of Seismic Stress on Photosynthetic Productivity, Gas Exchange, and Leaf Diffusive Resistance of *Glycine max* (L.) Merrill cv Wells II**—Thalia Pappas and Cary A. Mitchell*

290 **Membrane Development in the Cyanobacterium, *Anacystis nidulans*, during Recovery from Iron Starvation**—Himadri B. Pakrasi, Ann Goldberg, and Louis A. Sherman*

SHORT COMMUNICATIONS

296 **Identification of Cytokinins from Xylem Exudate of *Phaseolus vulgaris* L.**—Martin V. Palmer* and O. Choon Wong

299 **Biphasic Fluence Response Curves for Induction of Seed Germination**—Richard E. Kendrick* and John W. Cone

301 **Proteolytic Activity in Anther Extracts of Fertile and Cytoplasmic Male Sterile Petunia**—Fang-Sheng Wu* and Lynn E. Murry

306 **Promotion of Ethylene Evolution and Ripening of Tomato Fruit by Galactose**—Kenneth C. Gross

308 **The Biosynthesis of the Pyrenocines in Cultures of *Pyrenochaeta terrestris***—Salvatore A. Sparace and J. Brian Mudd*

311 **Protein Phosphorylation in Plant Mitochondria**—Stephen J. Danko* and John P. Markwell

315 **Changes in Carbohydrate Composition in Wheat and Pea Seedlings Induced by Calcium Deficiency**—Bjarke Veierskov* and Lubomir Meravý

318 **Augmented Growth Equation for Cell Wall Expansion**—Joseph K. E. Ortega

321 **Zeatin Metabolism in Fruits of *Phaseolus*. Comparison between Embryos, Seedcoat, and Pod Tissues**—Janet E. Turner, Machteld C. Mok, and David W. S. Mok*

323 **Reduced Phytic Acid Content Does Not Have an Adverse Effect on Germination of Soybean Seeds**—Victor Raboy, Stephen J. Hudson, and David B. Dickson*

326 **Corrections**

Number 2. October

327 **On the Role of Stored mRNA in Protein Synthesis in Embryonic Axes of Germinating *Vigna unguiculata* Seeds**—Yoshiharu Suzuki and Takao Minamikawa

332 **Effects of Temperature on Electron Transport in *Arum maculatum* Mitochondria**—Neil D. Cook* and Richard Cammack

336 **Changes in Polyamine Biosynthesis Associated with Postfertilization Growth and Development in Tobacco Ovary Tissues**—Robert D. Slocum* and Arthur W. Galston

344 **Active Extrusion of Protons into Deionized Water by Roots of Intact Maize Plants**—Konrad Mengel* and Sven Schubert

349 **Physiological Mechanism of the Auxin-Induced Increase in Light Sensitivity of Phytochrome-Mediated Growth Responses in *Avena* Coleoptile Sections**—James R. Shinkle* and Winslow R. Briggs

357 **Effect of Triacontanol on *Chlamydomonas*. I. Stimulation of Growth and Photosynthetic CO_2 Assimilation**—Robert L. Houtz, Stanley K. Reis, and N. E. Tolbert*

365 **Effect of Triacontanol on *Chlamydomonas*. II. Specific Activity of Ribulose-Bisphosphate Carboxylase/Oxygenase, Ribulose-Bisphosphate Concentration, and Characteristics of Photorespiration**—Robert L. Houtz, Stanley K. Ries, and N. E. Tolbert*

371 **Phytochrome Control of Levels of mRNA Complementary to Plastid and Nuclear Genes of Maize**—Yu S. Zhu, Shain D. Kung, and Lawrence Bogorad*

377 **Light and Decapitation Effects on *in Vitro* Rooting in Maize Root Segments**—Franck W. Golaz and

Paul-Emile Pilet*

381 **Interorgan Photosynthate Partitioning in Alfalfa**—Harry T. Cralle and Gary H. Heichel*

386 **Salicylhydroxamic Acid Potentiates Germination of 'Waldmann's Green' Lettuce Seed**—Carolyn A. Brooks, Kenneth S. Yu, and Cary A. Mitchell*

389 **Ion-Stimulated Stomatal Opening Induced by Preillumination in Epidermal Strips of *Commelina communis***—Hiroshi Inoue*, Munenori Noguchi, and Kazumi Kubo

394 **Properties of Phosphoglycolate Phosphatase from *Chlamydomonas reinhardtii* and *Anacystis nidulans***—H. David Husic * and N. E. Tolbert

400 **Effect of Photoperiod on Polyamine Metabolism in Apical buds of G2 Peas in Relation to the Induction of Apical Senescence**—Mary A. Smith* and Peter J. Davies

406 **Changes in Membrane Potential as a Demonstration of Selective Pore Formation in the Plasmalemma by Poly-L-Lysine Treatment**—Moshe Reuveni, Henri R. Lerner, and Alexandra Poljakoff-Mayber

411 **Effect of Temperature, Oxygen, and Gibberellic Acid on the Development of Photosensitivity in *Oldenlandia corymbosa* L. Seeds during Their Incubation in Darkness**—Françoise Corbineau and Daniel Côme*

415 **Plant Morphological and Biochemical Responses to Field Water Deficits. I. Responses of Glutathione Reductase Activity and Paraquat Sensitivity**—John J. Burke*, Patricia E. Gamble, Jerry L. Hatfield, and Jerry E. Quisenberry

420 **Elevation in the Sucrose Content of the Shoot Apical Meristem of *Sinapis alba* at Floral Evocation**—M. Bodson* and William H. Outlaw Jr.

425 **Reorganization of Thylakoid Components during Chloroplast Development in Higher Plants after Transfer to Darkness. Changes in Photosystem I Unit Components, and in Cytochromes**—Agapios Akoyunoglou and George Akoyunoglou*

432 **Fe^{III} Reducation in Cell Walls of Soybean Roots**—Carl L. Tipton* and Joan Thowsen

436 **Pyruvate Decarboxylase from *Zea mays* L. 2. Examination of Hysteretic Kinetics**—Pat J. Langston-Unkefer* and Thomas C. Lee

441 **The Effect of Low Osmotic Potential on Nitrite Reduction in Intact Spinach Chloroplasts**—Paul W. Behrens, Fujuan Xu, Marisa Werner, Teresa Hoffman, Thomas V. Marsho, and A. Bryan MacKay*

445 **Decreased Exopolysaccharide Synthesis by Anaerobic and Symbiotic Cells of *Bradyrhizobium japonicum***—Raymond E. Tully* and Maurice E. Terry

451 **Induction of a Specific N-Methyltransferase Enzyme by Long-Term Heat Stress during Barley Leaf Growth**—Timothy J. Leland and Andrew D. Hanson*

458 **Enzymic Capacities of Purified Cauliflower Bud Plastids for Lipid Synthesis and Carbohydrate Metabolism**—Etienne-Pascal Journet* and Roland Douce

468 **Association between Symptom Development and Inhibition of Ornithine Carbamoyltransferase in Bean Leaves Treated with Phaseolotoxin**—J. G. Turner* and R. E. Mitchell

474 **Effects of Ni Deficiency on Some Nitrogen Metabolites in Cowpeas (*Vigna unguiculata* L. Walp)**—Colin D. Walker, Robin D. Graham, James T. Madison, Earle E. Cary, and Ross M. Welch*

480 **Hemicelluloses of Cell Walls of a Proso Millet Cell Suspension Culture**—Nicholas C. Carpita*, Jenny A. Mulligan, and James W. Heyser

485 **Tensile Strength of Cell Walls of Living Cells**—Nicholas C. Carpita

489 **Purification and Properties of Glyoxysomal Lipase from Castor Bean**—Masayoshi Maeshima and Harry Beevers*

494 **Phospholipid Composition of a Plasma Membrane-Enriched Fraction from Developing Soybean Roots**—Carol E. Whitman and Robert L. Travis*

499 **Identification and Characterization of Latex-Specific Proteins in Opium Poppy**—Craig L. Nessler*, Randy D. Allen, and Samuel Galewsky

505 **Selection of *Nicotiana tabacum* Haploids of High Photosynthetic Efficiency**—Hipólito Medrano* and Eduardo Primo-Millo

509 **Assaying Ornithine and Arginine Decarboxylases in Some Plant Species**—Helena Birecka*, Alan J. Bitonti, and Peter P. McCann

515 **Activities of Arginine and Ornithine Decarboxylases in Various Plant Species**—Helena Birecka*, Alan J. Bitonti, and Peter P. McCann

520 **Light Scattering as an Indicator of the Energy State in Leaves of the Crassulacean Acid Metabolism Plant *Kalanchoë pinnata***—Sigrid Köster and Klaus Winter*

525 **5'-Methylthioadenosine Nucleosidase and 5-Methylthioribose Kinase Activities and Ethylene Production during Tomato Fruit Development and Ripening**—Mosbah M. Kushad, Daryl G. Richardson, and Adolpha J. Ferro*

530 **A Comparison of Two Sucrose Synthetase Isozymes from Normal and *shrunken*-1 Maize**—Craig S. Echt* and Prem S. Chourey

537 **The Effect of Sugars on the Binding of [^{203}Hg]-*p*-Chloromercuribenzenesulfonic Acid to Leaf Tissues**—Bertrand M'Batchi, Dominique Pichelin, and Serge Delrot*

543 **Control of Seed Coat Thickness and Permeability in Soybean. A Possible Adaptation to Stress**—L. D. Noddén*, K. A. Blakly, and J. M. Grzybowski

546 **Voltage Noise in *Acer pseudoplatanus* Cells. Basic Cellular Noise and Gramicidin A Induced Noise**—Joël Alexandre, Jean-Paul Lassalles, and Michel Thellier*

552 ***Anacystis nidulans* Demonstrates a Photosystem II Cation Requirement Satisfied Only by Ca^{2+} or Na^{+1}**—David W. Becker* and Jerry J. Brand

SHORT COMMUNICATIONS

559 **A Simple Procedure to Overcome Polyethelene Glycol Toxicity on Whole Plants**—Zvi Plaut* and Evelyn Federman

562 **Enhanced N-Transfer from a Soybean to Maize by Vesicular Arbuscular Mycorrhizal (VAM) Fungi**—Christopher van Kessel*, Paul W. Singleton, and Heinz J. Hoben

564 ***In Vitro* Biosynthesis of *Vicia faba* Polyphenoloxidase**—William H. Flurkey

568 **High Efficiency Transformation of Cultured Tobacco Cells**—Gynheung An

571 **Nucleotide Sequence of the F_1-ATPase α Subunit Gene from Maize Mitochondria**—Carl J. Braun and Charles S. Levings III*

578 **Corrections**

Number 3. November

579 **Regeneration in Alfalfa Tissue Culture. Stimulation of Somatic Embryo Production by Amino Acids and N-15 NMR Determination of Nitrogen Utilization**—Thomas A. Skokut, Jill Manchester, and Jacob Schaefer*

585 **Regeneration in Alfalfa Tissue Culture. Characterization of Intracellular pH During Somatic Embryo Production of Solid-State P-31 NMR**—Jacob Schaefer

590 **Control of Photosynthetic Sucrose Synthesis by Fructose 2,6-Bisphosphate. V. Modulation of the Spinach Leaf Cytosolic Fructose 1,6-Bisphosphatase Activity *in Vitro* by Substrate, Products, pH, Magnesium, Fructose 2,6-Bisphosphate, Adenosine Monophosphate, and Dihydroxyacetone Phosphate**—Mark Stitt*, Bernd Herzog, and Hans W. Heldt

599 **Control of Photosynthetic Sucrose Synthesis by Fructose 2,6-Bisphosphate. VI. Regulation of the Cytosolic Fructose 1,6-Bisphosphatase in Spinach Leaves by an Interaction between Metabolic Intermediates and Fructose 2,6-Bisphosphate**—Mark Stitt* and Hans W. Heldt

609 **Effects of Nitrate Application on *Amaranthus powellii* Wats. I. Changes in Photosynthesis, Growth Rates, and Leaf Area**—E. Raymond Hunt, Jr., James A. Weber, and David M. Gates*

614 **Effects of Nitrate Application on *Amaranthus powellii* Wats. II. Stomatal Response to Vapor Pressure Differences Is Consistent with Optimization of Stomatal Conductance**—E. Raymond Hunt, Jr., James A. Weber, and David M. Gates*

619 **Effects of Nitrate Application on *Amaranthus powellii* Wats. III. Optimal Allocation of Leaf Nitrogen for Photosynthesis and Stomatal Conductance**—E. Raymond Hunt, Jr., James A. Weber, and David M. Gates*

625 **Stem Extension Rate in Light-Grown Plants. Effect of Photo- and Thermoperiodic Treatments on the Endogenous Circadian Rhythm in *Chenopodium rubrum***—Alain Lecharny*, Michael Schwall, and Edgar Wagner

630 **Isoflavonoid Formation as an Indicator of UV Stress in Bean (*Phaseolus vulgaris* L.) Leaves. The Significance of Photorepair in Assessing Potential Damage by Increased Solar UV-B Radiation**—Christopher J. Beggs*, Andrea Stolzer-Jehle, and Eckard Wellmann

635 **Control by Ethylene of Arginine Decarboxylase Activity in Pea Seedlings and Its Implicaton for Hormonal Regulation of Plant Growth**—Akiva Apelbaum*, Arie Goldblust, and Isaac Jackson

641 **Aminopeptidase Activity from Germinated Jojoba Cotyledons**—Russell Johnson and Richard Storey*

646 **Control of Plastidic Glycolipid Synthesis and Its Relation to Chlorophyll Formation**—Udo Kosmac and J. Feirabend*

653 **Abscisic Acid Accumulation by Roots of *Xanthium strumarium* L. and *Lycopersicon esculentum* Mill. in Relation to Water Stress**—Katrina Cornish and Jan A. D. Zeevaart*

659 **Hormonal Regulation of the Lectin Biosynthesis in Callus Culture of the *Phaseolus vulgaris* Plant**—Carl A. K. Borrebaeck* and Lotta Linsefors

663 **Seed Growth Rate and Carbohydrate Pool Sizes of the Soybean Fruit**—Gary M. Fader and H. Ronald Koller*

667 **Identification of 3-(O-β-Glucosyl)-2-Indolone-3-Acetylaspartic Acid as a New Indole-3-Acetic Acid Metabolite in *Vicia* Seedlings**—Seiji Tsurumi* and Shunji Wada

672 **Presence of Heat Shock mRNAs in Field Crown Soybeans**—Janice A. Kimpel* and Joe L. Key

679 **Role of Ethylene in the Senescence of Isolated Hibiscus Petals**—William R. Woodson*, Susan H. Hanchey, and Duane N. Chisholm

684 **Effects of CO_2 Enrichment and Carbohydrate Content on the Dark Respiration of Soybeans**—Terry C. Hrubec, J. Michael Robinson*, and Robert P. Donaldson

690 **Triosephosphates Modulate Leaf Mitochondrial Phosphorylation by Inhibition and Uncoupling of Electron Transport**—Rüdiger Hampp

695 **Possible Control of Maize Leaf Sucrose-Phosphate Synthase Activity by Light Modulation**—Richard C. Sicher* and Diane F. Kremer

699 **Altered Leaf Structure and Function in Triazine-Resistant Common Groundsel (*Senecio vulgaris*)**—Jodie Sims Holt* and Deborah P. Goffner

706 **Biosynthesis and Degradation of a Wheat Embryo Cytokinin-Binding Protein during Embryogenesis and Germination**—A. Chris Brinegar, Anne Stevens, and J. Eugene Fox*

711 **Differentially Regulated Isozymes of 3-Deoxy-D-arabino-Heptulosonate-7-Phosphate Synthase from Seedlings of *Vigna radiata* (L.) Wilczek**—Judith L. Rubin and Roy A. Jensen*

719 **The Compartmentation of Abscisic Acid and β-D-Glucopyranosyl Abscisate in Mesophyll Cells**—Elizabeth A. Bray and Jan A. D. Zeevaart*

723 **Extremely Low Frequency Resistance Fluctuations of *Chara* Membrane**—Ashok V. Gokhale and William F. Pickard*

725 **Intermediates in the Formation of the Chlorophyll Isocyclic Ring**—Yum-Shing Wong, Paul A. Castelfranco*, Dane A. Goff, and Kevin M. Smith

730 **Properties of the Mg-Protoporphyrin IX Monomethyl Ester (Oxidative) Cyclase System**—Yum-Shing Wong and Paul A. Castelfranco*

734 **H^+ Extrusion and Potassium Uptake Associated with Potential Hyperpolarization in Maize and Wheat Root Segments Treated with Permeant Weak Acids**—Giulia Romani, Maria Teresa Marrè, Mario Bellando, Giuseppe Alloatti, and Erasmo Marrè*

740 **Sexual Agglutination in the Unicellular Green Alga *Chalmydomonas eugametos*. Identification and Properties of the Mating Type plus Agglutination Factor**—Frans M. Klis*, Marieke R. Samson, Egbert Touw, Alan Musgrave, and Herman van den Ende

746 **Regulation by ABA of β-Conglycinin Expression in Cultured Developing Soybean Cotyledons**—Elizabeth A. Bray* and Roger N. Beachy

751 **Intracellular Localization of Lunularic Acid and Prelunularic Acid in Suspension Cultured Cells of *Marchantia polymorpha***—Setsuko Abe Imoto and Yoshimoto Ohta*

756 **Effect of Frost Hardening on Lipid and Fatty Acid Composition of Chloroplast Thylakoid Membranes in Two Wheat Varieties of Contrasting Hardiness**—Lásló Vigh, Ibi Horvàth, Philip R. van Hasselt, and Pieter J. C. Kuiper*

760 **Selection and Characterization of *Chlorella* Mutants**

Deficient in Amino Acid Transport. Further Evidence for Three Independent Systems—Norbert Sauer* and Widmar Tanner

765 **3-Deoxy-D-*arabino*-Heptulosonate 7-Phosphate Synthase from Carrot Root (*Daucus carota*) Is a Hysteretic Enzyme**—JoAnn A. Suzich, Jeffrey F. D. Dean, and Klaus M. Hermann*

771 **Potassium Transport in Corn Roots. IV. Characterization of the Linear Component**—Leon V. Kochian, Jiao Xin-zhi, and William J. Lucas*

777 **Studies on the Photoactivation of the Water-Oxidizing Enzyme. I. Processes Limiting Photoactivation in Hydroxylamine-Extracted Leaf Segments**—Franklin Ellis Callahan and George M. Cheniae*

787 **Enzymic Degradation of Allantoate in Developing Soybeans**—Rodney G. Winkler, Joseph C. Polacco*, Dale G. Blevins, and Douglas D. Randall

794 **Structure and Possible Ureide Degrading Function of the Ubiquitous Urease of Soybean**—Joseph C. Polacco*, Roger W. Krueger, and Rodney G. Winkler

801 **Pyrimidine Nucleoside Uptake by Petunia Pollen. Specificity and Inhibitor Studies on the Carrier-Mediated Transport**—Rajender K. Kamboj and John F. Jackson*

806 **Purification and Partial Characterization of Ribulose Bisphosphate Carboxylase Holoenzyme and Its Subunits from *Chlorella sorokiniana* and Use of Its Antigen Affinity-Purified Antibodies in Specific Immunoprecipitation and Immunoadsorption Procedures**—P. David Toman, James J. Lynch, Jr., and Robert R. Schmidt*

815 **Comparison of Patterns of Accumulation of Ribulose Bisphosphate Carboxylase Antigen and Catalytic Activity and Measurement of Antigen Half-Life during the Cell Cycle of *Chlorella sorokiniana***—P. David Toman and Robert R. Schmidt*

820 **Peroxidases and Glycosidases in Intercellular Fluids from Noninoculated and Rust-Affected Wheat Leaves. Isozyme Assay on Nitrocellulose Blots from Two-Dimensional Gels**—David W. Holden* and Roland Rohringer

825 **Light-Induced Alkalinization of the Suspending Medium of Guard Cell Protoplasts from *Vica faba* L.**—Kiyoshi Gotow*, Takeshi Sakaki, Noriaki Kondo, Koh Kobayashi, and Kunihiko Syōno

829 **Light Activation of NADP-Malate Dehydrogenase in Guard Cell Protoplats from *Vicia faba* L.**—Kiyoshi Gotow*, Kiyoshi Tanaka, Noriaki Kondo, Koh Kobayashi, and Kunihiko Syōno

833 **Varying Photoperiod, Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase and CO_2 Uptake in *Thalassiosira fluviatilis* (Bacillariophyceae)**—Louis A. Hobson*, W. James Morris, and Kathryn P. Guest

838 **Sucrose and Starch Synthesis in Spinach Plants Grown under Long and Short Photosynthetic Periods**—Chris Baysdorfer and J. Michael Robinson*

843 **The Hypersensitive Reaction of Tobacco to *Pseudomonas syringae* pv. *pisi*. Activation of a Plasmalemma K^+/H^+ Exchange Mechanism**—Merelee M. Atkinson, Jeng-Sheng Huang, and James A. Knopp*

848 **Enzyme Activities of Starch and Sucrose Pathways and Growth of Apical and Basal Maize Kernels**—Tsai-Mei Ou-Lee and Tim Lloyd Setter*

852 **Effect of Increased Temperature in Apical Regions of Maize Ears on Starch-Synthesis Enzymes and Accumulation of Sugars and Starch**—Tsai-Mei Ou-Lee and Tim Lloyd Setter*

856 **Subcellular Localization of the Pathway of *de Novo* Pyrimide Nucleotide Biosynthesis in Pea Leaves**—Holly D. Doremus* and Andre T. Jagendorf

862 **Effects of Acifluorfen on Endogenous Antioxidants and Protective Enzymes in Cucumber (*Cucumis sativus* L.) Cotyledons**—William H. Kenyon and Stephen O. Duke*

867 **Messenger RNAs from the Scutellum and Aleurone of Germinating Barley Encode (1 → 3,1 → 4) β-D-Glucanase; α-Amylase and Carboxypeptidase**—John Mundy, Anders Brandt, and Geoffrey B. Fincher*

872 **Photochemical Apparatus Organization in the Chloroplasts of Two *Beta vulgaris* Genotypes**—Javier Abadia, Richard E. Glick*, Scott E. Taylor, Norman Terry, and Anastasios Melis

879 **ATP Production by Respiration and Fermentation, and Energy Charge during Aerobiosis and Anaerobiosis in Twelve Fatty and Starchy Germinating Seeds**—Philippe Raymond*, Ali Al-Ani, and Alain Pradet

885 **Germination, Respiration, and Adenylate Energy Charge of Seeds at Various Oxygen Partial Pressures**—Ali Al-Ani*, Françoise Bruzau, Philippe Raymond, Véronique Saint-Ges, Jean Marc LeBlanc, and Alain Pradet

891 **Measurement of the Water Potential of Stored Potato Tubers**—William L. Bland and Champ B. Tanner*

896 **Photosynthetic Responses to Dynamic Light Environments by Hawaiian Trees. Time Course of CO_2 Uptake and Carbon Gain during Sunflecks**—Robert W. Pearcy*, Katherine Osteryoung, and Howard W. Calkin

SHORT COMMUNICATIONS

903 **'Dark-Lethality' of Certain *Chlamydomonas reinhardtii* Strains Is Prevented by Dim Blue Light**—Robert John Thompson*, John P. Davies, and Gisela Mosig

908 **Possible Regulatory Roles of Cytokinins. NADH Oxidation by Peroxidase and a Copper Interaction**—Carlos O. Miller

911 **A Rapid Increase in Spinach Leaf Fructose 2,6-Bisphosphate Occurs during a Light to Dark Transition**—Chris Baysdorfer and J. Michael Robinson*

914 **Nucleotide Sequence of ATPase Subunit 6 Gene of Maize Mitochondria**—R. E. Dewey, Charles S. Levings III*, and D. H. Timothy

920 ***In Vitro* Activation of Phosphoglucomutase by Fructose 2,6-Bisphosphate**—Cynthia M. Galloway*, W. M. Dugger, Jr., and Clanton C. Black, Jr.

Number 4. December

923 **Purification and Properties of Glutamine Synthetase from Spinach Leaves**—Mary C. Ericson

928 **An Investigation into the Role of Photosynthesis in Regulating ATP Levels and Rates of H^+ Efflux in Isolated Mesophyll Cells**—Alan W. Bown* and Freda Nicholls

935 **Immunohistochemical Localization of α-Amylase in Cotyledons of *Vigna mungo* Seedlings**—Hideaki Tomura*, Tomokazu Koshiba, and Takao Minamikawa

939 **Biosynthesis of α-Amylase in *Vigna mungo* Cotyledon**—Hideaki Tomura* and Tomokazu Koshiba

943 **Constant Phycobilisome Size in Chromatically Adapted Cells of the Cyanobacterium *Tolypothrix tenuis*, and Variation in *Nostoc* sp.**—Kaori Ohki, Elisabeth Gantt*, Claudia A. Lipschultz, and Marjorie C. Ernst

949 **Interspecific Variation in SO_2 Flux. Leaf Surface *versus* Internal Flux, and Components of Leaf Conductance**—David M. Olszyk* and David T. Tingey

957 **Purfication and Characterization of the Soluble F_1-ATPase of Oak Root Mitochondria**—Stephen K. Randall, Yanzhi Wang, and Heven Sze*

963 **Competition for *in Vitro* [^{3}H]Gibberellin A_4 Binding in Cucumber by Gibberellins and Their Derivatives**—Nasser Yalpani and Lalit M. Srivastava*

968 **Interaction of Wheat Germ Ca^{2+}-Dependent Protein Kinases with Calmodulin Antagonists and Polyamines**—Gideon M. Polya* and Vito Micucci

973 **Ethylene Production by Suspension-Cultured Pear Fruit Cells as Related to Their Senescence**—Rolf Puschmann, Dangyang Ke, and Roger Romani*

977 **A Role for Fructose 2,6-Bisphosphate in Regulating Carbohydrate Metabolism in Guard Cells**—Rainer Hedrich, Klaus Raschke*, and Mark Stitt

983 **Light Intensity Adaptation and Phycobilisome Composition of *Microcystis aeruginosa***—Shirley Raps*, J. Helen Kycia, Myron C. Ledbetter, and Harold W. Seigelman

988 **Identification and Isolation of Single Cells that Produce Somatic Embryos at a High Frequency in a Carrot Suspension Culture**—Koji Nomura* and Atsushi Komamine

992 **Photoinhibition and Reactivation of Photosynthesis in the Cyanobacterium *Anacystis nidulans***—Göran Samuelsson*, Anders Lönneborg, Eva Rosenqvist, Peter Gustafsson, and Gunnar Öquist

996 **Osmotic Adjustment by Intact Isolated Chloroplasts in Response to Osmotic Stress and Its Effect on Photosynthesis and Chloroplast Volume**—Simon P. Robinson

1003 **Role of Ca^{2+} and EGTA on Stomatal Movements in *Commelina communis* L.**—Amnon Schwartz

1006 **Nitrate Reductase of Green Algae Is Located in the Pyrenoid**—Antonio Lopez-Ruiz, Jean Pierre Verbelen, Jose Manuel Roldan, and Jesus Diez*

1011 **Photocontrol of Hypocotyl Elongation in Light-Grown *Cucumis sativus* L. Responses to Phytochrome Photostationary State and Fluence Rate**—Victor Gaba* and Michael Black

1015 **Carbon Balance and Water Relations of Sorghum Exposed to Salt and Water Stress**—Steven G. Richardson and Keith J. McCree*

1021 **Membrane Electrical Noise in *Chara corallina*. I. A Low Frequency Spectral Component**—Stephen Ross and Jack Dainty*

1026 **Direct Demonstration of Duvatrienediol Biosynthesis in Glandular Heads of Tobacco Trichomes**—Carolyn K. Keene and George J. Wagner*

1033 **Factors Affecting Ice Nucleation in Plant Tissues**—Edward N. Ashworth*, Glen A. Davis, and Jeffrey A. Anderson

1038 **Influence of Shoot Structure on Light Interception and Photosynthesis in Conifers**—Gregory A. Carter and William K. Smith*

1044 **Stimulation of Glutathione Synthesis in Photorespiring Plants by Catalase Inhibitors**—Ivan K. Smith

1048 **Resistance of Citrus Fruit to Mass Transport of Water Vapor and Other Gases**—Shimshon Ben-Yehoshua*, Stanley P. Burg, and Roger Young

1054 ***Glycine-Glomus-Rhizobium* Symbiosis. II. Antagonistic Effects between Mycorrhizal Colonization and Nodulation**—Gabor J. Bethlenfalvay*, Milford S. Brown, and Allan E. Stafford

1059 **Chloroplast Biogenesis 51. Modulation of Monovinyl and Divinyl Protochlorophyllide Biosynthesis by Light and Darkness *in Vitro***—Edward E. Carey, Baishnab C. Tripathy, and Constantin A. Rebeiz*

1064 **Potassium and Sodium Absorption Kinetics in Roots of Two Tomato Species. *Lycopersicon esculentum* and *Lycopersicon cheesmanii***—Anne F. Wrona* and Emanuel Epstein

1068 **Potassium Transport in Two Tomato Species. *Lycopersicon esculentum* and *Lycopersicon cheesmanii***—Anne F. Wrona* and Emanuel Epstein

1072 **Differential Expression of the Ribulose Bisphosphate Carboxylase Large Subunit Gene in Bundle Sheath and Mesophyll Cells of Developing Maize Leaves Is Influenced by Light**—Jenq-Yunn Sheen and Lawrence Bogorad*

1077 **Effect of Foliar Applications of Urea on Accelerated Senescence of Maize Induced by Ear Removal**—Frederick E. Below*, Steven J. Crafts-Brandner, and Richard H. Hageman

1080 **Auxin Regulation of a Proton Translocation ATPase in Pea Root Plasma Membrane Vesicles**—Reinhard Gabathuler and Robert E. Cleland*

1086 **Drought-Induced Increases in Abscisic Acid Levels in the Root Apex of Sunflower**—J. Mason Robertson*, Richard P. Pharis, Yan Y. Huang, David M. Reid, and Edward C. Yeung

1090 **Hydrolysis of Intracellular Proteins in Vacuoles Isolated from *Acer pseudoplatanus* L. Cells**—Hervé Canut*, Gilbert Alibert, and Alain M. Boudet

1094 **Voltage-Dependent Channels Found in the Membrane Fraction of Corn Mitochondria**—David Phillips Smack and Marco Colombini*

1098 **Stereochemical Aspects of the Biosynthesis of the Side Chain of 9β,19-Cyclopropyl Sterols in Maize Seedlings Treated with Tridemorph**—Michèle Bladocha and Pierre Benveniste*

1107 **The Senescence of Detached Leaves of *Tropaeolum***—Kenneth V. Thimann

1111 **A Ca^{2+}/H^+ Antiport System Driven by the Proton Electrochemical Gradient of a Tonoplast H^+-ATPase from Oat Roots**—Karen S. Schumaker and Heven Sze*

1118 **Topography of the Protein Complexes of the Chloroplast Thylakoid Membrane. Studies of Photosystem II using Pronase Digestion and Chemical Labeling**—Eric Lam and Richard Malkin*

SHORT COMMUNICATIONS

1125 **Transport and Assimilation of Nitrogen by *Stichococcus bacillaris* Grown in the Presence of Methionine Sulfoximine**—Iftikhar Ahmad* and Johan A. Hellebust

1127 **The Equilibrium of the Reaction Catalyzed by Sucrose Phosphate Synthase**—George A. Barber

1129 **Corn Mitochondrial Protein Synthesis in Response to Heat Shock**—Christine M. Nebiolo* and Elizabeth M. White

1133 **Rapid Oscillations in Fructose 2,6-Bisphosphate Levels in Plant Tissues**—Nachman Paz, Dian-Peng Xu, and Clanton C. Black, Jr.*
